ISRAEL STUDY ABROAD

May 2018

Spend 12 days in the Holy Lands studying agriculture and the rich culture of Israel.

History spanning from the Canaanite period to Israeliite, Muslim, and Christian periods comes alive as you walk the ancient streets of Jerusalem, the modern agricultural fields of the Jezreel Valley, the ancient olive trees in Garden of Gethsemane, and the shores of the Sea of Galilee. The agriculture of Israel utilizes some of the most advanced irrigation in the world while maintaining some of the oldest known production methods. We will visit major biblical sites throughout Jerusalem and Galilee.

Students will participate in a supervised, active archaeology dig at Tel Maresha.
